

Group reading sessions

You can use the app for group reading sessions either in class or in the library.

Split your class to form mini book clubs. This would work well for blended classes or classes with a really wide ability range.

Use the app to facilitate guided reading sessions for a small group of learners.

Shared reading time. Learners can follow along with a story as you read aloud, helping them access texts they may not be able to enjoy on their own.

Use your reading time/library lesson to read a group book or for individual time. Follow up with a task set which allows learners to be creative! Can they re-write the ending of their book or write a letter to an author?
